Anthology of NUDE PHOTOGRAPHY

by **Dani Olivier**

The body of work featured in this book are genuine photographs. They have been neither doctored up nor altered. They are in fact the actual prints of the image captured by the objective.

Dani Olivier's creates his effects at the time of the shoots, by projecting complex images and intricate light patterns on his models. He never touches up the originals.

The models are nude. They do not wear enhancing accessories. Their makeup is minimal. The pictures are taken with a black background. There are no artifacts: Just the models and the light projections. The projections are either abstract or figurative. The final composition is always surreal.

Mr Olivier's unique style is introduced for the first time in this body of work. His abstract and psychedelic nudes are his exclusive creations.

They confer a new dimension and innovative approach to the art of nude photography.
